

General catalogue 2020

Since 1945 superior quality products
for motorhomes, caravans,
van conversions and camper vans

Fiamma is known worldwide as a pioneer and leading company in manufacturing technical accessories for the recreational vehicle market.

INDEPENDENT FAMILY-OWNED COMPANY

Fiamma has more than 100 patents registered in Europe, USA, Japan and China. The headquarters in Cardano al Campo focuses on product design and worldwide distribution. In addition there are eight manufacturing facilities where product improvements, technology innovation and new production processes are constantly implemented. The Fiamma catalogue is translated into 11 languages including Chinese, Japanese and Russian.

Since 1996

Since 2002

Production monitored and safety tested

Fiamma: certified in environmental and climate protection

1945

Fiamma was founded by Norma and Arnaldo Pozzi. The name Fiamma, which in Italian means "flame" comes from the company's first product: an aluminium gas stove for camping.

Fiamma is the first company in Europe to introduce a complete range of superior quality products for Motorhomes and Trailers.

1973

1980

Fiamma starts its operation in the American market and becomes a leader in the production of awnings for Class B Motorhomes.

Fiamma creates the International Motorhome Club to strengthen the relationship between the company and its end-users. Fiamma becomes the first company in this market to get the TÜV-GS (German Quality Control) for its awnings.

1984

1987

Fiamma expands into the Japanese market to become the country's leading manufacturer of accessories for recreational vehicles.

Fiamma receives ISO 9002 certification.

1996

2002

Fiamma receives ISO 9001 certification for its new and state-of-the art factory located in Cardano al Campo.

Fiamma opens new departments equipped with high tech machinery, thereby increasing its production capacity by 40%.

2003

2005

Inauguration of Fiamma Service, the completely automated distribution center of spare parts.

John-David Pozzi (since 2008) and Charles Pozzi, grandsons of Norma and Arnaldo Pozzi, collaborate together in the function of Managing Directors of Fiamma Spa.

2012

2018

Thanks to competent and experienced technicians and through using modern state of the art testing equipment, Fiamma inaugurates the new laboratory and testing area.

Fiamma celebrates 75 years of activity.

2020

Tradition & Quality

FIAMMA.COM

On the Fiamma website you can find all updates and information on our products. In the “points of sale” section you can also find a list of the best Fiamma dealers.

COME AND VISIT US

The Fiamma stand is the meeting point for many motorhome fans in 52 international exhibitions of the RV industry. You can find the original Fiamma products in a selected network of motorhome specialists with extensive experience in the industry guaranteeing customer satisfaction.

RELIABLE QUALITY

Spare parts drawings for all Fiamma awnings, Carry-Bike and other Fiamma accessories are available online at www.fiamma.com. Our technical assistance team guarantees a prompt delivery of more than 10,000 spare parts. If you want to get the best quality and an excellent after-sales service, choose Fiamma products.

INNOVATION AND SAFETY

Fiamma has invested in cutting edge equipment and highly qualified staff to set up its excellent test laboratory in order to guarantee continuous growth in quality of the manufactured products. Before hitting the market, our new products are subjected to strict tests such as FEM analyses during the design phase using the most advanced aerospace software, along with raw materials testing, laser analysis, crash tests and many other specific tests and trials.

CARRY-BIKE

Fiamma Carry-Bike: the original bike carrier!

Fiamma bike carriers are manufactured in our factory in Cardano al Campo, Italy, made with state of the art technology.

Quality

Fiamma Carry-Bikes use the highest quality anodized aluminium rounded tubes. For even greater resistance and capacity, several Fiamma Carry-Bike models use an improved, extendable rounded frame. Fiamma Carry-Bikes are manufactured using only long life stainless steel screws and have the double reinforced bike carrier rail and the safety strap Quick-Safe. Some models are equipped with the innovative and exclusive Rail Premium.

Safety

All Fiamma Carry-Bikes are rigorously tested in our laboratories before being released into the market, in order to grant the greatest security. Fiamma Carry-Bikes have passed many reliability and security tests, for this reason they are preferred by many OEM manufacturers who preinstall them on the walls of their vehicles.

Innovation

E-BIKES

Fiamma offer 6 models dedicated to E-Bike transport: Pro, Pro C and Lift 77 (with lowering support rail with a drop of 77cm) for Motorhome, the Mercedes V Class Lift for Campervan and XLA Pro 200 and Caravan Active (both for A Frame installation) for Caravan.

Please contact your local dealer to see if your Electric Bikes are suitable, and that they do not exceed the maximum permitted weight.

We suggest that the installation is carried out by a dealer.

Fiamma recommends to use only the special versions of Carry-Bike for E-Bike if you want to transport electric bicycles.

Bike carrier solutions for any RV

No matter what the vehicle is, in our wide range of Carry-Bikes you will find the right model!

Motorhome

- Installation to the rear wall
- Specific models are available for E-Bike as well

Caravan

- Installation on the A-frame or to the rear wall
- Specific models are available for E-Bike as well

Campervan

- Specific models for the most common vehicles
- Specific models are available for E-Bike as well

Van Conversion

- Specific models for the most common vehicles with single and double rear door

SUV / 4x4

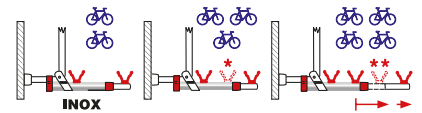

- Models with installation to the rear door or the rear spare tyre

[1] ZOOM 4 BIKES

ZOOM-4 BIKES is the telescopic rail support with a thicker rounded tube, reinforced elements in stainless steel and aluminium allowing to fit up to 4 bikes.

[2] BIKE-BLOCK

Bike-Block Pro and Pro S, which are delivered as standard with the majority of Carry-Bikes, are anti-scratch, safe and easy to use fixing kit for bicycles. Perfect for all tubes with diameter from 25 to 100mm.

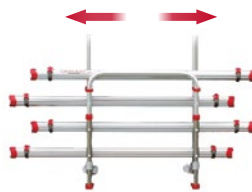

[3] BULL SHOCK ABSORBER

Bull Shock Absorber is the best and most reliable system for shock and vibration absorption during travel.

[4] EASY POSITION

Easy position is the system to offset the rails of the bike carrier in order to simplify the transport of multiple bikes at the same time. All rails are mechanically fixed by means of rust free stainless steel screws to avoid movement.

[5] RAIL PREMIUM / RAIL QUICK PRO / RAIL STRIP PRO

Different styles of rails to suit the different Carry Bike models. All versions have recently been renewed, giving a modern design and a more practical use. Solidity and performance guaranteed over time.

[6] QUICK LOCK

Quick-Safe is the safety strap to safely mount and lock the wheels on the bike carrier rail. Easy release for immediate opening.

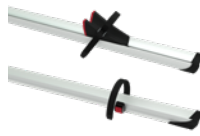

[7] RACK HOLDER

It's a locking system which hold the racks of the carrier closed while it is not in use.

From motorhomes to caravans and minivans. All Carry-Bike models dedicated to the transport of electric bicycles

PRO E-BIKE

The telescopic bike carrier, leader of Pro line, here in the special version for E-Bikes. Has a highly adjustable upper structure for better stability. The rounded tube structure is easily adjustable from 80 to 150cm in height to fit different installation requirements.

PRO C E-BIKE

The Pro C E-Bike carrier can be installed under the rear window of the motorhome whilst still allowing it to open. It is the most compact on the market, and has an adjustable installation from 40 to 50cm.

LIFT 77 E-BIKE

The E-Bike carrier with pivoting rail support base, it lowers as much as 77cm enabling the E-bikes to be loaded and unloaded easily

Fiamma recommends to use only the special versions of Carry-Bike for E-Bike if you want to transport electric bicycles

**CARAVAN
ACTIVE E-BIKE**

Special version specifically designed for the transportation of two electric bicycles. Thanks to the system with tensioning strap, access to the storage compartment is easy and quick.

**CARAVAN
XL A PRO 200 E-BIKE**

Model designed to be installed on the caravan A-frame for carrying two E-Bikes. Suitable for all A-frames.

**MERCEDES
V CLASS LIFT E-BIKE**

Model for Mercedes V Class with pivoting rail support base which can be lowered by 77cm to facilitate loading and unloading operations of two electric bicycles. It comes complete with number plate holder bar and lights.

Rail Premium

All Fiamma bike carriers designed for electric bikes are delivered as standard with two Rail Premium. The updated rail without wheel locking handwheel (see page 134) ensures quick and safety fastening of electric bicycles.

CARRY-BIKE Pro Series

The Pro Line of Bike carriers provides the solution to transport up to 4 bikes with height installation possibilities for almost every eventuality – from 40cm – 150cm.

Delivered as standard with Zoom-4-Bikes rail support that can carry up to two additional rails and with lower fixing kits with elegant Kit Support Bar provided with screws and counter plates for more flexibility of installation. Also available versions suitable for E-Bikes.

PRO

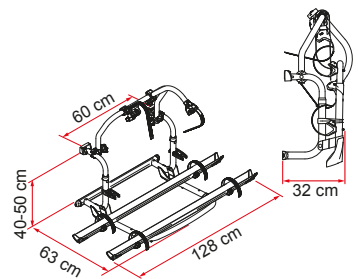

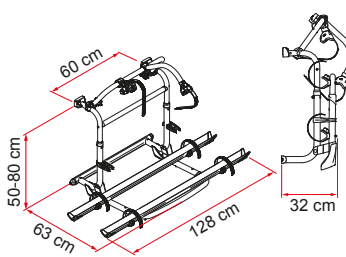

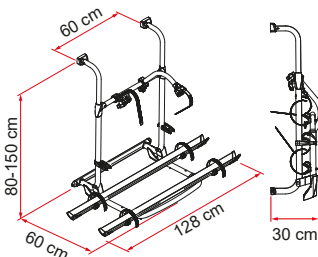

This telescopic bike carrier, is the longest version of the Pro series, and has a highly adjustable upper structure for better stability. The rounded tube structure is easily adjustable from 80 to 150cm in height to fit different installation requirements.

PRO M

Intermediate version of Pro series with adjustable installation from 50 to 80cm, covering every requirement of installation with Pro and Pro C. Telescopic and adjustable structure.

PRO C

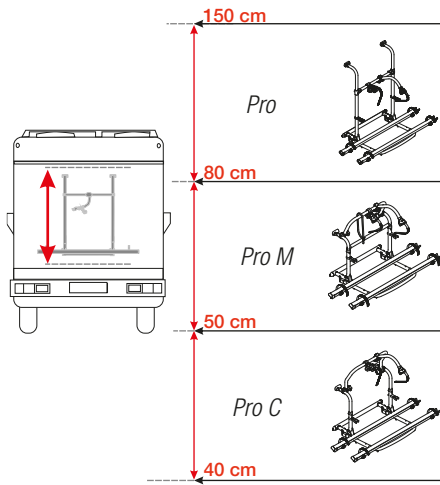

The compact and classic bike carrier, the shortest version of the Pro series which is installed under the rear window whilst still allowing it to open.

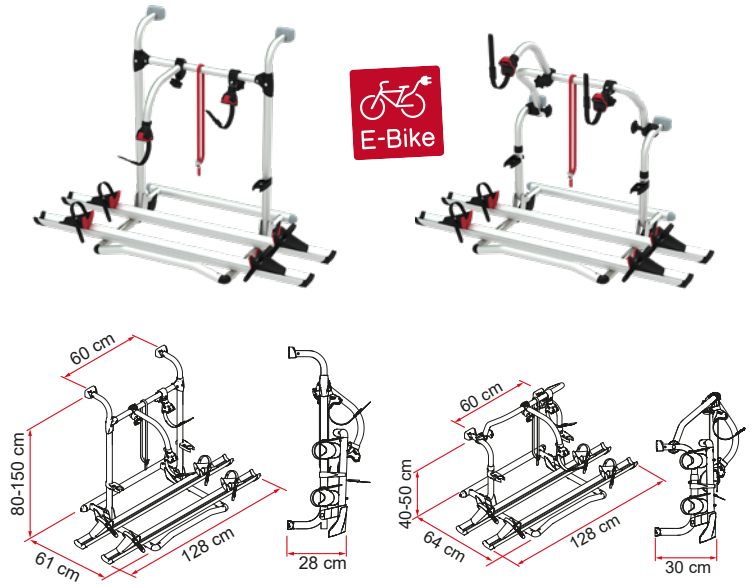

Choose the right model!!

This drawing helps you to easily find the Carry-Bike Pro most suitable for your vehicle.

PRO E-BIKE

PRO C E-BIKE

Kit Upgrade E-Bike

To carry your electric bicycles on your Carry-Bike Pro, Pro M or Pro C

Now you can turn your Carry-Bike Pro, Pro M, Pro C into a E-Bike bike carrier by purchasing the Kit Upgrade E-Bike (Item No. 98656M137). Complete rail support base with two Rail Premium, structurally designed to carry two electric bicycles.

● Standard ○ Optional

CARRY-BIKE L Series

The affordable bike carrier, lightweight but robust

The L series of Fiamma Carry-Bikes are the ideal solution for transporting up to three bicycles in total safety and at low cost. A modern, reliable and aesthetically pleasing range.

UL

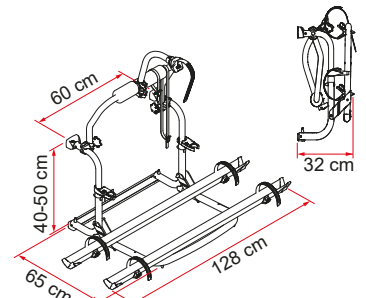

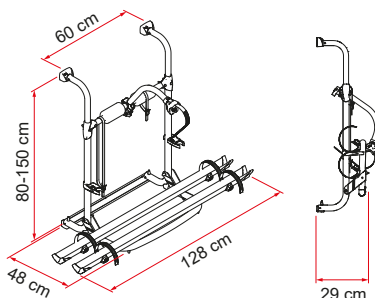

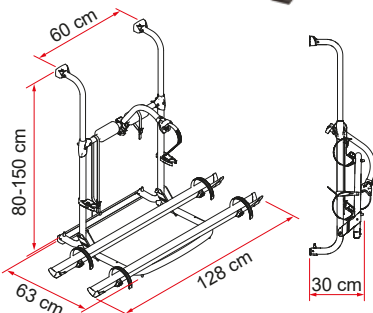

The classic and affordable bike carrier. Adjustable structure from 80 to 150cm in anodized aluminium.

UL 48

Similar to the UL model but with reduced projection, only 48cm. Comes with two rails, carries up to two bicycles.

CL

The strong, affordable and compact bike carrier. The solid yet light anodized aluminium structure is telescopic and adjustable from 40 to 50cm. It can also be installed under the motorhome rear window.

Choosing guide

Position

To be installed on the back wall of your motorhome. CL version is specially designed to fit below the rear window.

Capacity

Two bikes carried as standard, the models UL and CL can carry up to three bikes by adding an extra Rail and Bike-Block.

Rails

Two Rail Quick Pro delivered as standard which can carry any sort of bike and can also slide horizontally for easy positioning of the bikes.

Bike-Block

One Bike-Block Pro delivered as standard. Bike-Block Pro 2 optional for an extra bike (for models UL and CL).

Less weight, lower price and maximum reliability

Carry-Bike UL and CL have passed reliability and security tests, for this reason they are preferred by many OEM manufacturers who preinstall them on the walls of their vehicles.

It lowers as much as 77cm enabling the bikes to be loaded and unloaded easily

It has a practical operating position and magnetic hooking to the handle for further operator ease of use. Crank handle can be shortened to suit every type of requirement. With its exclusive Zoom-4-bikes rail support, delivered with Extra-Large safety straps which carry up to 60 kg and safety system that avoids accidental unhooking en-route. Two versions available, for standard bikes and electrical bikes.

LIFT 77

LIFT 77 E-BIKE

Choosing guide

Position

To be installed on the back wall of your motorhome. Wall fixing points range from 68 to 108cm.

Capacity

Two bikes carried as standard, the Lift 77 model carries up to 4 bikes with extra Rails and optional Bike Blocks.

Rails

Two Rail Quick/Premium delivered as standard which can carry any sort of bike and can also slide horizontally for easy positioning of the bikes.

Bike-Block Pro

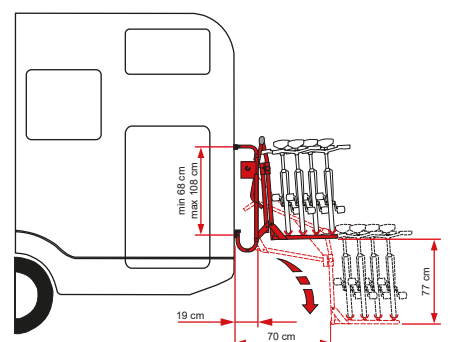

Two Bike Block Pro/Pro S delivered as standard. For the Lift 77, Bike Blocks Pro 2 and Pro 4 are optional for extra bikes.

E-Bikes

The Carry-Bike Lift 77 E-Bike, together with the models Pro E-Bike and Pro C E-bike, are the ideal solution for transporting two electric bikes with a motorhome. It has been further strengthened to carry up to 60 kg in complete safety and with maximum ease of loading. Made of sturdy 35mm Ø anodised aluminium tubes and rail support base in stainless steel that guarantees absolute sturdiness. Perfect to lift 60 kg in complete safety. Maximum load per rail: 30 Kg.

The range of bike carriers for the A-frame of the Caravan

The Caravan Active, XLA Pro and XLA Pro 200 models pivot forward allowing access to the storage compartment even when bikes are mounted (XLA model pivots forward but only when bikes are not mounted). Loading the bikes is a simple and safe operation. Standard A frame does not require drilling. Any plastic / fibre glass covers that cover the A frame need to be removed in order to fit the XLA range.

CARAVAN ACTIVE

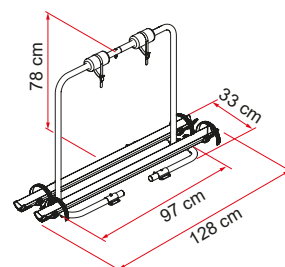

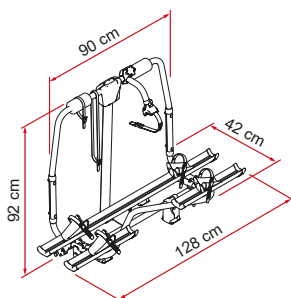

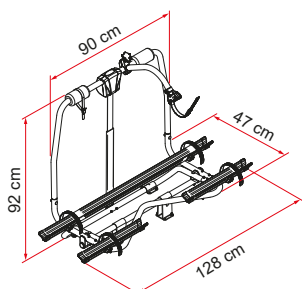

The latest generation bike carrier for A frame. Thanks to the system with tensioning strap, access to the storage compartment is easy and quick.

CARAVAN ACTIVE E-BIKE

Special version of Caravan Active specifically designed for the transportation of two electric bicycles. It's equipped with Rail Premium for a maximum load of 30kg per rail.

CARAVAN XL A

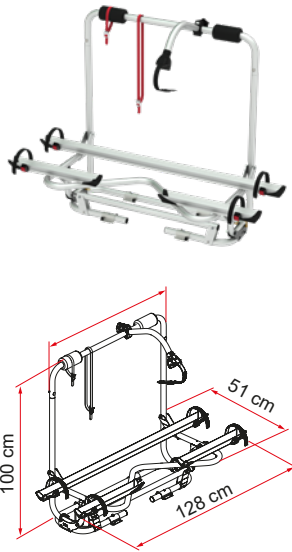

Compact and inexpensive, fits almost all Caravan frames (including Hobby and Al-Ko).

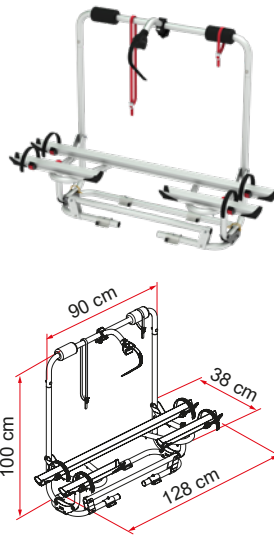

CARAVAN XL A PRO

Provided with reinforced bar, come as standard for two bikes, third optional rail can be added
Smaller size for short drawbars.

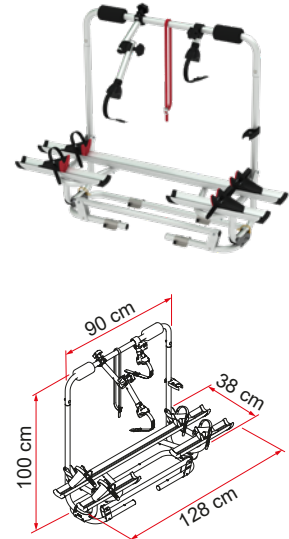

CARAVAN XL A PRO 200

Equipped with the external rail in two pieces to grant maximum possibility of installation and use.
Smaller size for short drawbars.

CARAVAN XL A PRO 200 E-BIKE

Special version specifically designed for the transport of two electric bicycles.
It fits all A-frame.
Reinforced structure for maximum safety.

The complete range of bike carriers for the rear wall of the caravan

Bike carriers suitable for mounting on the rear wall of caravans. Three models developed to satisfy any need.

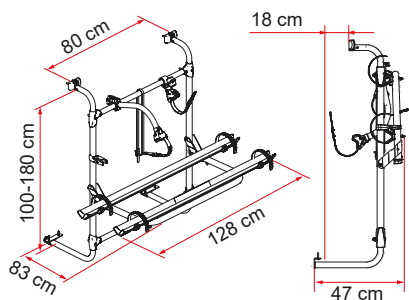

CARAVAN HOBBY

Suitable for mounting to the rear wall of Hobby Caravans, produced after 2003. The special upper brackets are positioned under the rail of the rear window. The lower fixing kit is a central bracket.

CARAVAN UNIVERSAL

Fixed to the caravan frame (Bürstner, Chateau etc.). Upper and lower brackets are installed by using self-tapping screws. Telescopic frame. Adjustable from 100 to 180 cm.

Choosing guide

Position

To be installed on the back wall of your caravan. Suitable for all types of caravan.

Capacity

The Caravan Hobby model carries two bikes as standard and has the possibility to add an extra Rail and Bike-Block for a third bike.
Max Load 35/50kg.

Rails

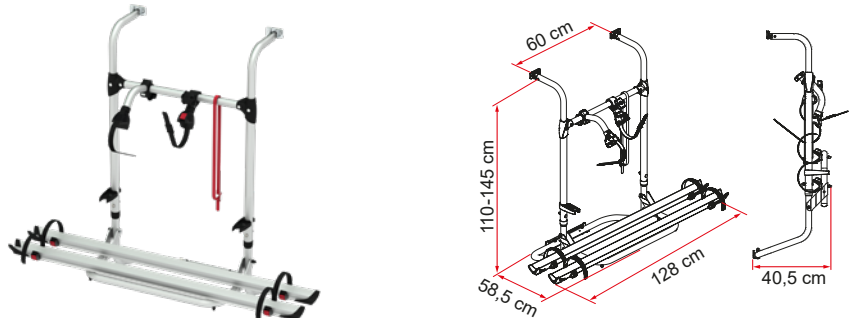

Two Rail Quick Pro delivered as standard which can carry any sort of bike and can also slide horizontally for easy positioning of the bikes.

Bike-Block Pro

Two Bike-Blocks Pro delivered as standard for models Universal and Simple Plus.
One Bike-Block Pro for the model Caravan Hobby.

SIMPLE PLUS 200

Suitable for mounting on caravans with thin and curved rear walls. Installed by using the existing wall reinforcement points. Telescopic frame.

VW T5 PRO / VW T6 PRO: aesthetically modern, fast and simple to install, solid anchoring to the reinforced points of the rear of the vehicle

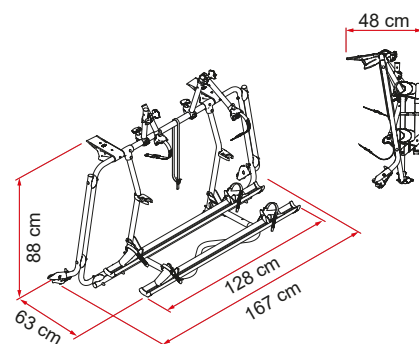

The stylish design harmoniously follows the line of the vehicle without covering lights and number plate. Simplicity and speed of installation / demounting and excellent rigidity on the rear of the vehicle. The upper brackets are fastened to the reinforced points of the rear of the vehicle, brackets are complete with plastic supports in the centre of them, free from any hooks the lower part of the vehicle does not lean against the bumper. Equipped with double lower reinforcing bar to ensure maximum stability. The shape of the rail support base [1], together with the optional rail split into two pieces [2], ensures excellent visibility of the central brake light, when four bikes are in use.

CARRY-BIKE VW T5 Pro / T6 Pro

CARRY-BIKE VW T6 Pro Deep Black

Deep Black version

Additional total black version for the Carry-Bike VW T6 Pro Deep Black that perfectly integrates the new body finish and the dark plastic parts.

Carry-Bike minivan VW

Easy installation without drilling the vehicle

From VW Caddy to T2.

Fiamma offers a full range of bike carriers for every need.

For the new season Fiamma presents a specific bike carrier for Volkswagen Caddy campervan for the transport of four bikes.

VW CADDY

new

Bike carrier specially designed for VW Caddy > 2016. The articulated upper structure allows an accurate adjustment of the position of the Bike-Blocks to secure the bikes while the practical lower tensioning system allows the Carry-Bike to be safely fixed to the vehicle. The shaped brackets are attached to the reinforcement points of the tailgate. The solid anodized aluminium rail support base guarantees excellent resistance to strains/stress. Available from March 1st, 2020.

VW T4

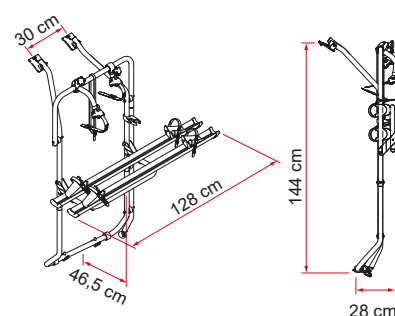

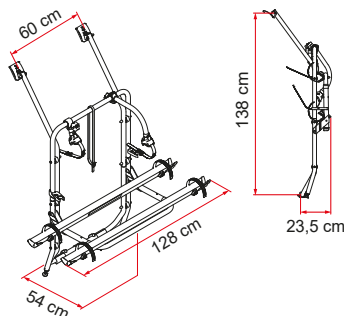

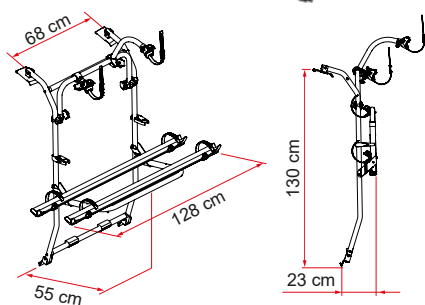

After 1991.

Bike carrier specially designed for Volkswagen T4 with single rear door. It can also be installed on the following vehicle models:

- VW California
- VW Coach
- VW Caravelle
- VW Multivan

VW T5 D / T6 D

Bike carrier specially designed for Volkswagen T5 and T6 with double rear doors. Easy installation with brackets, that are delivered as standard, without drilling the vehicle.

VW T4 D

Bike carrier specially designed for Volkswagen T4 with double rear doors. Easy installation with brackets, that are delivered as standard, without drilling the vehicle.

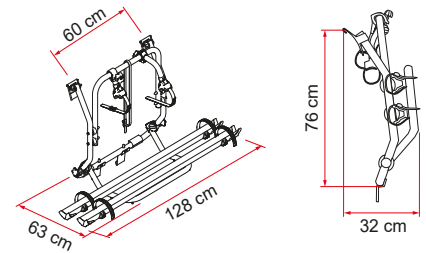

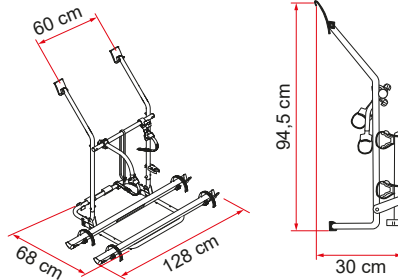

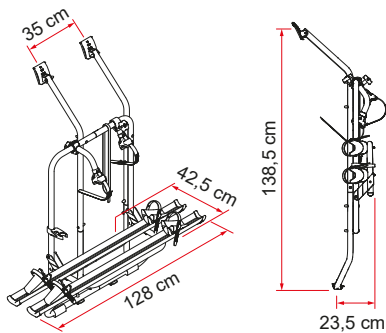

VW T3 (T25)

After 1980.

CARRY-BIKE Mercedes

MERCEDES VIANO

For Mercedes Viano with single rear door, also suitable for Mercedes Vito from 2004 up to 2014.

Supplied with:

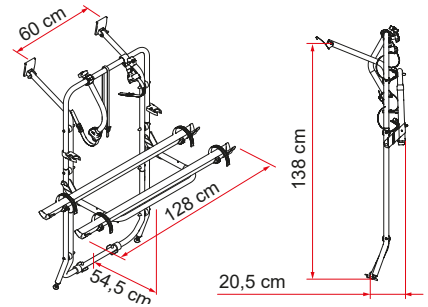

- 1x Carry-Bike Mercedes Viano
- 1x lighting board wired with 13 pin plug.

MERCEDES VITO

For Mercedes Vito with single rear door. Up to 2004.

On Mercedes Vito from 2004 install the model Mercedes Viano.

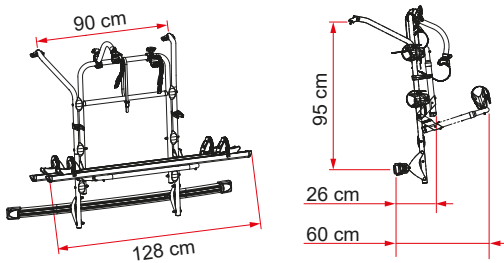

MERCEDES V CLASS PREMIUM

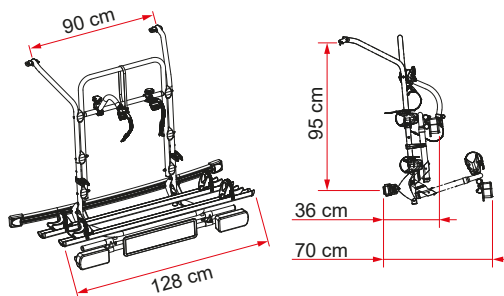

For easily transporting up to 4 bicycles on the Mercedes V Class with a single tailgate.

This version allows the installation of the rail support base in two different positions, one standard [A] and one lower [B] to make it easier to load the bikes.

Lower version must be used with the License Plate Carrier, which has the license plate holder bar and regulation lights [1].

[A] Standard rail support base

[B] Lower rail support base

Advantage:

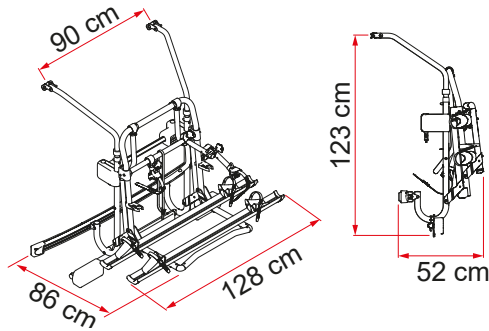

The upper structure of the bike carrier is screwed to the vehicle chassis through the original vehicle mounting points [3], making it more stable and avoiding incorrect positioning problems during installation.

MERCEDES V CLASS LIFT E-BIKE

The support rail drops by 77cm [2] enabling the bikes to be loaded and unloaded easily. Delivered as standard with Licence Plate Carrier [1]. Suitable for transporting two E-Bikes.

1 Licence Plate Carrier

2 Dropping support rail

3 Fixing without drilling

CARRY-BIKE Ducato Frame

new

Carry-Bike Ducato Frame

The bike carrier that carries 3 bikes on the double rear door

Here is the new Carry-Bike Frame specific for Ducato >2006. The sturdy stainless steel frame [1] is installed using the attachment points present as standard [2 and 3] on the vehicle. This version allows the mounting of the rail support base in three positions, standard, intermediate and one lowered to facilitate the loading of the bikes.

In the intermediate and lowered positions it is necessary to use the licence plate holder bar with lighting group Licence Plate Carrier.

It can carry up to three bicycles in total safety. Available in two versions, anodised aluminium and black aluminium Deep Black, both versions have a stainless steel frame. Not suitable for vehicles with 270° hinge system. The installation requires the cutting of a small part of the bumper [3].

Available from March 1st, 2020.

Standard rail support base

Midway rail support base

Lower rail support base

1 Solid stainless steel structure

2 Upper Fixing

3 Lower Fixing

Carry-Bike 200 DJ Ducato.

Restyling for the version >2006.

The new structure, thanks to the adoption of a single 35mm Ø aluminium tube, is light and modern, maintaining the solidity that has always distinguished this model.

The new structure guarantees a quicker and safer installation, also thanks to the new system of attachment of the main structure to the Fixing Bars.

The black colour of the plastics and covers is elegant and integrates perfectly with the vehicle.

This version allows the mounting of the rail support base in three positions, standard, intermediate and lowered to facilitate the loading of the bikes.

In the intermediate and lowered positions it is necessary to use the licence plate holder bar with lighting group Licence Plate Carrier (see page 141).

Two versions available: anodised aluminium and Deep Black version (in black aluminium).

Suitable for:

- Fiat Ducato after 2006 (H2 and H3)
- Citroën Jumper after 2006
- Peugeot Boxer after 2006

CARRY-BIKE SUV

The bike carrier with universal straps for SUV and cars

The simple, rapid and safe solution to install a bike carrier on SUVs and 4x4.

BACKPACK

The Carry-Bike with universal straps is easily installed on all minivans.

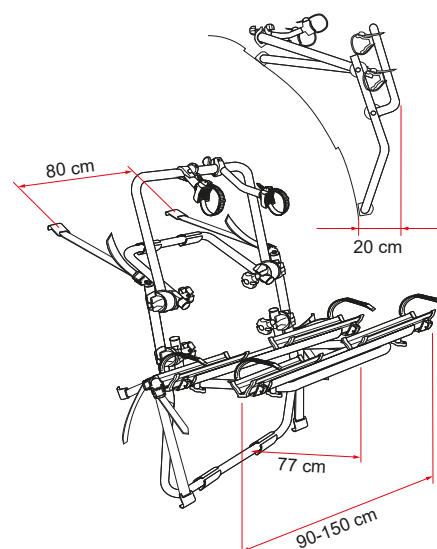

Not suitable for fibreglass rear doors.

No tools are required for installation, 6 superior Heavy Duty Quick Lock straps secure the bike carrier to the vehicle.

Sturdy anodized aluminium tubes.

Stainless steel screws.

Consult your dealer to verify correct installation.

Choosing guide

Position

To be installed on the back wall of the vehicle with special straps.

Capacity

Two bikes carried as standard, up to 3 with extra Rail Quick C and additional Bike-Block for the model Backpack 4x4.

Rails

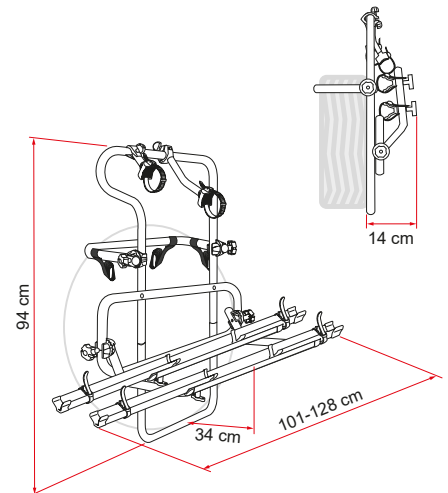

Two Rail C delivered as standard, which can carry any sort of bike and can also slide horizontally for easy positioning of the bikes.

Bike-Block Pro

Bike-Block Pro 1 and 3 (1 and 2 for the models 4x4) and 1 Security Strip delivered as standard.

BACKPACK 4x4

Bike carrier for SUV with rapid installation to the rear spare tyre thanks to the sturdy straps. Before mounting remove the rigid cover of the spare tyre.

Bikes safe in the garage facility

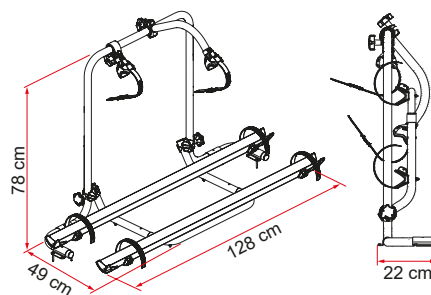

Different models of bike carriers to install in the garage facility of your motorhome, in order to transport your bikes safely.

Various models available according to the number of bikes you wish to transport and the dimensions of your garage.

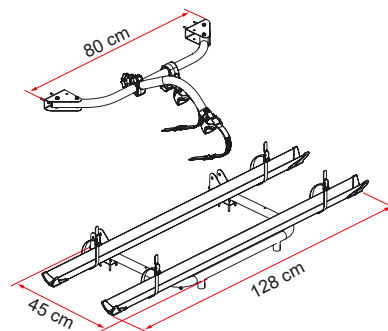

GARAGE PLUS

[1] Bike carrier for motorhomes with garage facility. Lower section can be folded up when not in use giving more floor space if required. With optional accessories carries up to 4 bikes.

GARAGE STANDARD

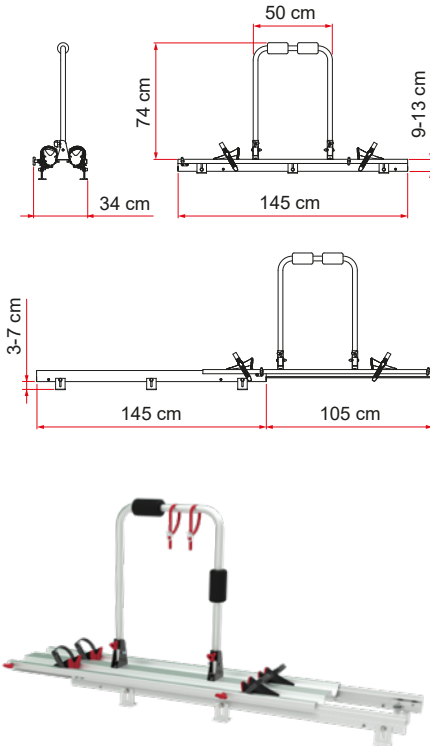

[2] Bike carrier with lower section fastened to the floor and Bike-Block fixed to the wall or to the roof. Carries up to 3 bikes. Can be folded up when not in use giving more floor space if required.

GARAGE SLIDE PRO BIKE

[3] Sliding bike carrier to install in the garage facility or storage compartment of the motorhome. Wide loading surface. Carries 2 bikes.

GARAGE PACK PLUS

[4] Multi-purpose kit complete with fixing structure for bikes and various accessories to arrange the garage facility in the best way.

Consists of:

- 2x aluminium bars 63cm
- 2x aluminium bars 198cm
- 2x aluminium bars 79cm
- 2x reinforced rails
- 1x support bar to fix Bike-Block
- 1x Bike-Block Pro D1 and Pro D2
- 1x Pack Organizer Shoes
- 1x Pack Organizer S
- 8x galvanized rings
- 1x rubber band Ø 0,8 x 180cm
- 4x Strip to fix bikes.

GARAGE PACK

[5] Multi-purpose kit to quickly and economically arrange the garage of your motorhome.

Simple and flexible modular system.

Consists of:

- 2x aluminium bars 63cm
- 1x aluminium bar 198cm
- 2x reinforced rails
- 2x galvanized rings
- 1x rubber band Ø 0,8 x 180cm.

The moto carrier range for the garage facility of your motorhome

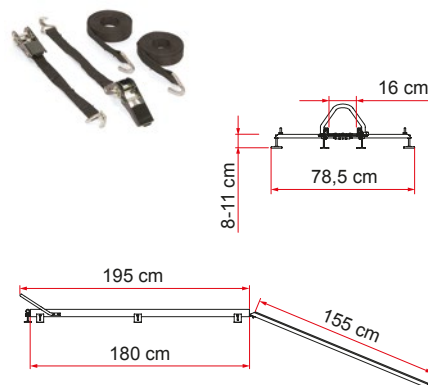

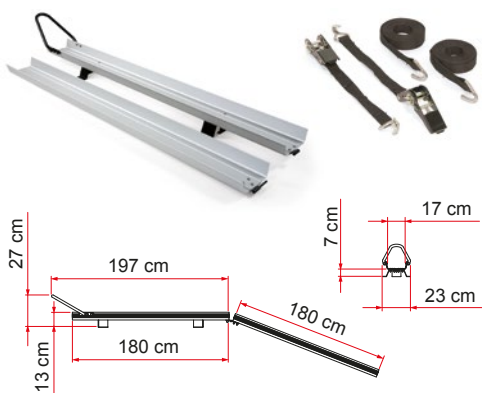

Different moto carrier systems, ideal to be installed in motorhomes with garage facilities. Some models are suitable for minivans or for the door of the motorhome. We suggest to always verify the usable height of your garage before purchasing the product.

CARRY-MOTO

Motor-bike carrier in galvanized aluminium consisting of a rail and a chute which slides in easily, to connect with the rail to facilitate the loading of the motorbike. Supplied with 2 sturdy straps to fix the motorbike while travelling.

CARRY-MOTO PRO

[1] Carry-Moto system in galvanized aluminium composed of 2 telescopic rails equipped with anti-slip device. It can easily be fixed inside the garage thanks to the fixing feet which are adjustable in height from 8cm to 11 cm. Consists of a rail fixed on the floor of the garage and a chute which slides easily inside the fixed rail. The rail is supplied with 2 straps to fix the motorbike while travelling.

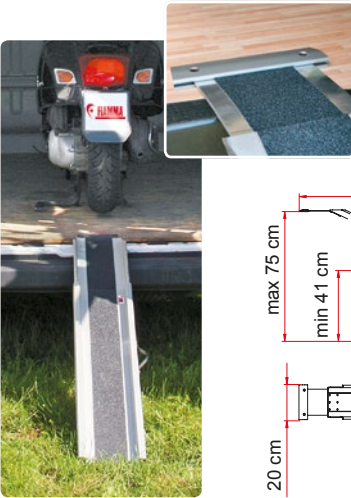

CARRY-RAMP

Motorbike ramp in galvanized aluminium that can be installed in the doorway of your motorhome or on the floor of the garage facility. Once the fixed plate is installed on the floor the ramp can be easily hooked and unhooked.

The rail can reach a length of 175cm through the telescopic slide. With 2 pieces of Carry-Ramp you can create a system of ramps for loading scooters and wheelchairs.

The 2 ramps hold up to 130kg, do not load wheelchairs when occupied.

MOTO WHEEL CHOCK

The wheel chock for your motorbike is the ideal complement for the Carry-Ramp. Made of painted black steel.

Moto Wheel Chock Front: easy to assemble and remove thanks to the 4 screw anchor holes. Complete with kit for fixing to wood floors and two click strips.

Moto Wheel Chock Rear: easy to assemble and to remove thanks to the quick removable knobs.

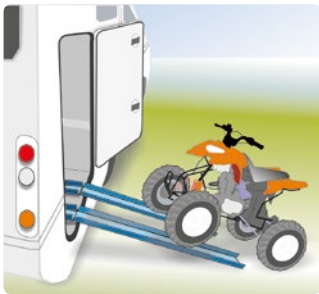

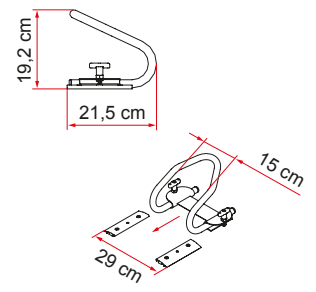

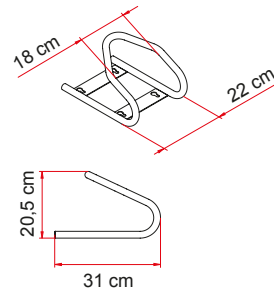

Delivered as standard with rails for floor fixing.

Rails for transporting and fixing any kind of bike

Different types of rails available for transporting any kind of bike.

They are easily installed on bike carriers of any brand and fit most diameters of wheels on the market.

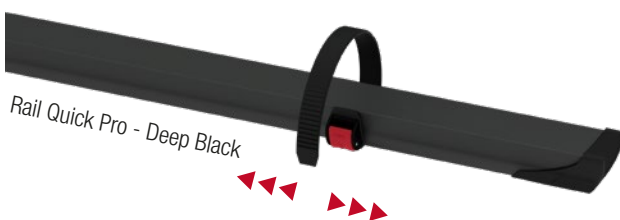

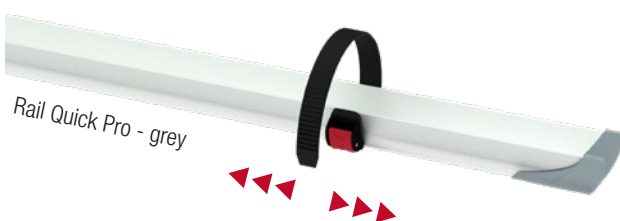

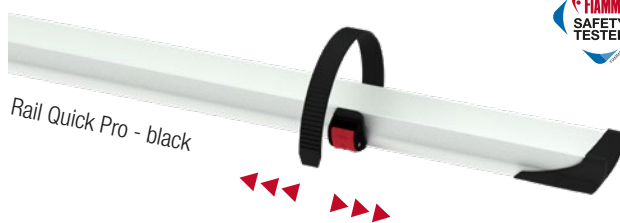

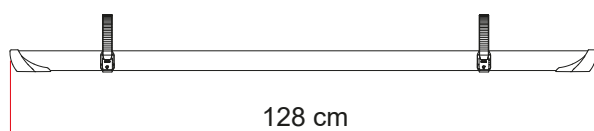

The load on Fiamma bike carriers must be distributed evenly over each of the rails, eg. a Carry Bike Pro rack if carrying 60kg of weight should have 15kg weight on each of the four rails.

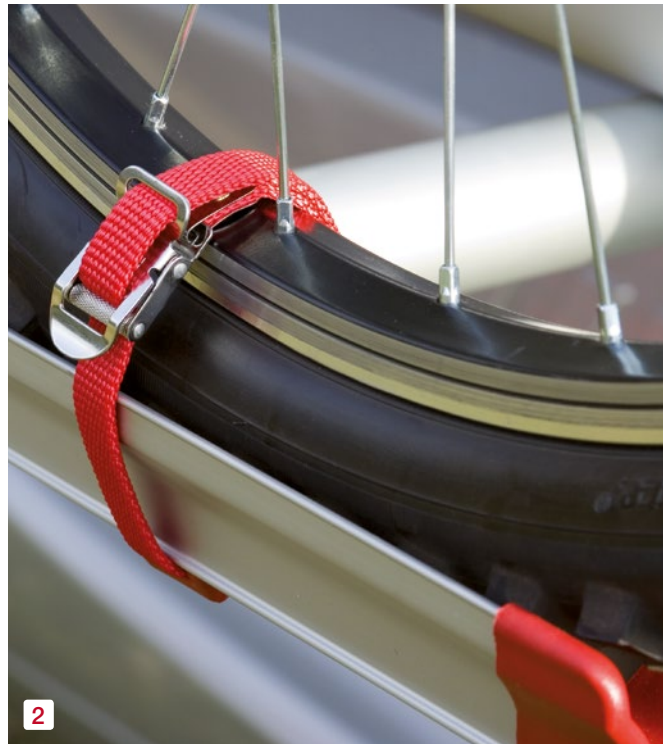

RAIL QUICK PRO

[1] The original sturdy rail with a reinforced base delivered with two standard Quick-Safe sliding straps.

Easy to install on the Carry-Bike thanks to the pre-drilled holes on the rail support base.

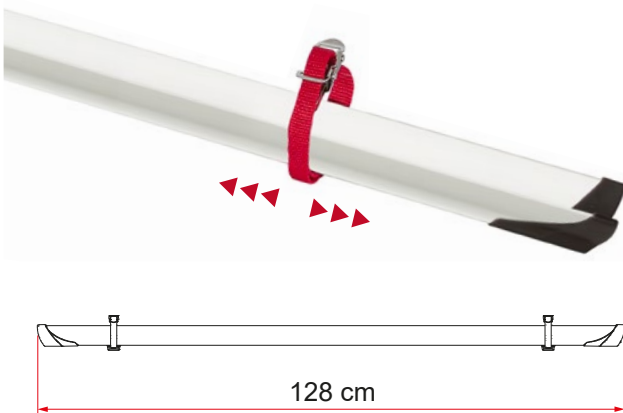

Rail Quick Pro is interchangeable with the previous Rail Quick version.

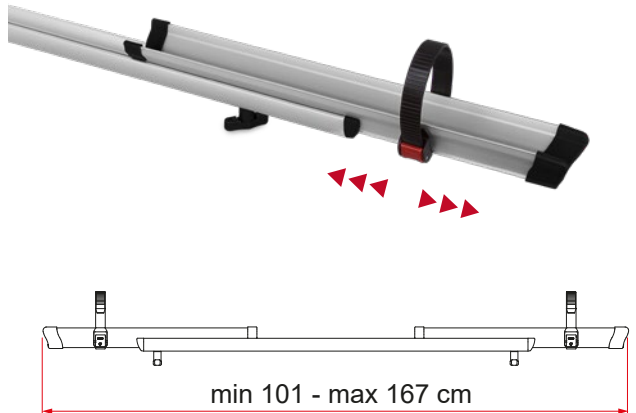

RAIL STRIP PRO

[2] The sturdy rail with a reinforced base and two sliding straps. Easy to install on the Carry-Bike thanks to the pre-drilled holes on the rail support base. Rail Strip Pro is interchangeable with the previous model Rail Strip.

RAIL QUICK C

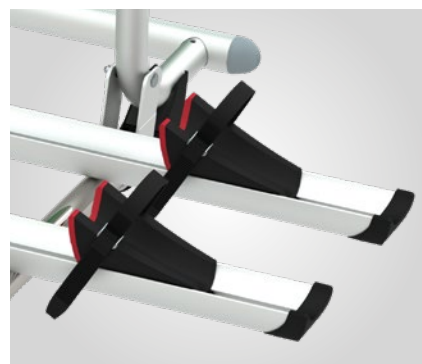

[3] Telescopic rail that can be adjusted to the desired extension, supplied with two Quick-Safe straps. Ideal to limit rail overhang. It can easily be installed on almost all bike carriers.

Description	Colour	Hooking type	Left-Right sliding	Back-Forward sliding	Length	Weight	Item No.

● Standard ○ Optional

Rail

Refreshed design of the Premium Rail guide with new bicycle support block

If you wish to transport electric bikes, Fiamma recommends that you choose the Carry-Bike models specifically designed and developed for E-Bikes (see page 100-101) fitted with Rail Premium.

It is possible to transport a maximum of 2 electric bicycles on a Carry-Bike, we also recommend that the Rail Premium are placed close to the wall of the vehicle, and we suggest removing the batteries of the electric bikes for to limit the weight on the wall itself.

RAIL PREMIUM

[1] The restyling of the product has made it even easier and more practical to use. We have eliminated the adjustment and fastening handwheel. Just place the bicycle wheel in the strap and in combination with the rubber support, it will securely lock the bicycle on the rail.

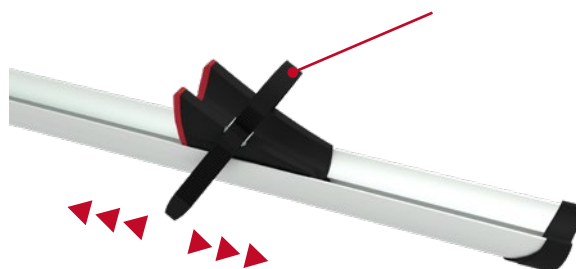

RAIL PREMIUM XL

[2] The XL version is longer (139cm) and suited for particularly long E-Bikes and Mountain-Bikes (with wheelbase > 125cm).

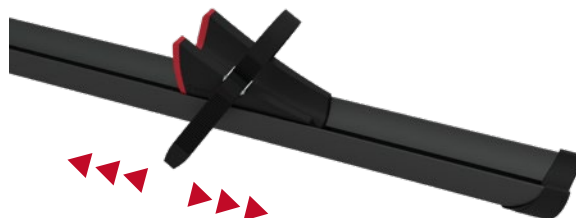

Rail Premium / XL

The 31cm strap is suitable for all bikes on the market

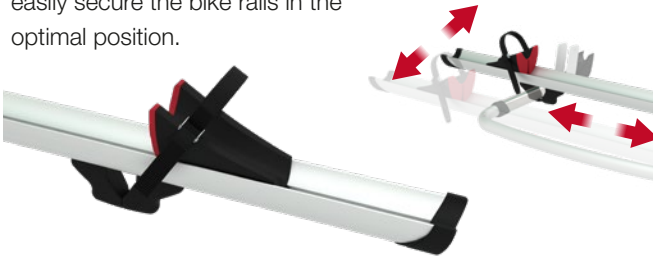

Rail Premium / XL Deep Black

RAIL PREMIUM S

[3] Rail with increased structure size. The Premium S is similar to the Rail Premium but is also equipped with lower slide clamps that move in both directions, enabling you to easily secure the bike rails in the optimal position.

KIT PREMIUM S

[5] Allows to convert Rail Quick and Rail Premium into Rail Premium S. You simply have to unmount the standard hooks and replace them with Premium S hooks. Now rails can slide vertically and horizontally to be adapted to the dimensions of different bikes.

RAIL PREMIUM S FAT BIKE

[4] New model based on Rail Premium S version for transporting modern bicycles with tyres up to 5-inches wide on Fiamma bicycle carriers.

KIT RAIL PREMIUM 48

[6] Optional fourth two-part rail for Carry-Bike VW T5 Pro and T6 Pro models. Also available in the Deep Black version.

Kit Upgrade E-Bike

To carry your electrical bicycles on your Carry-Bike Pro, Pro M or Pro C

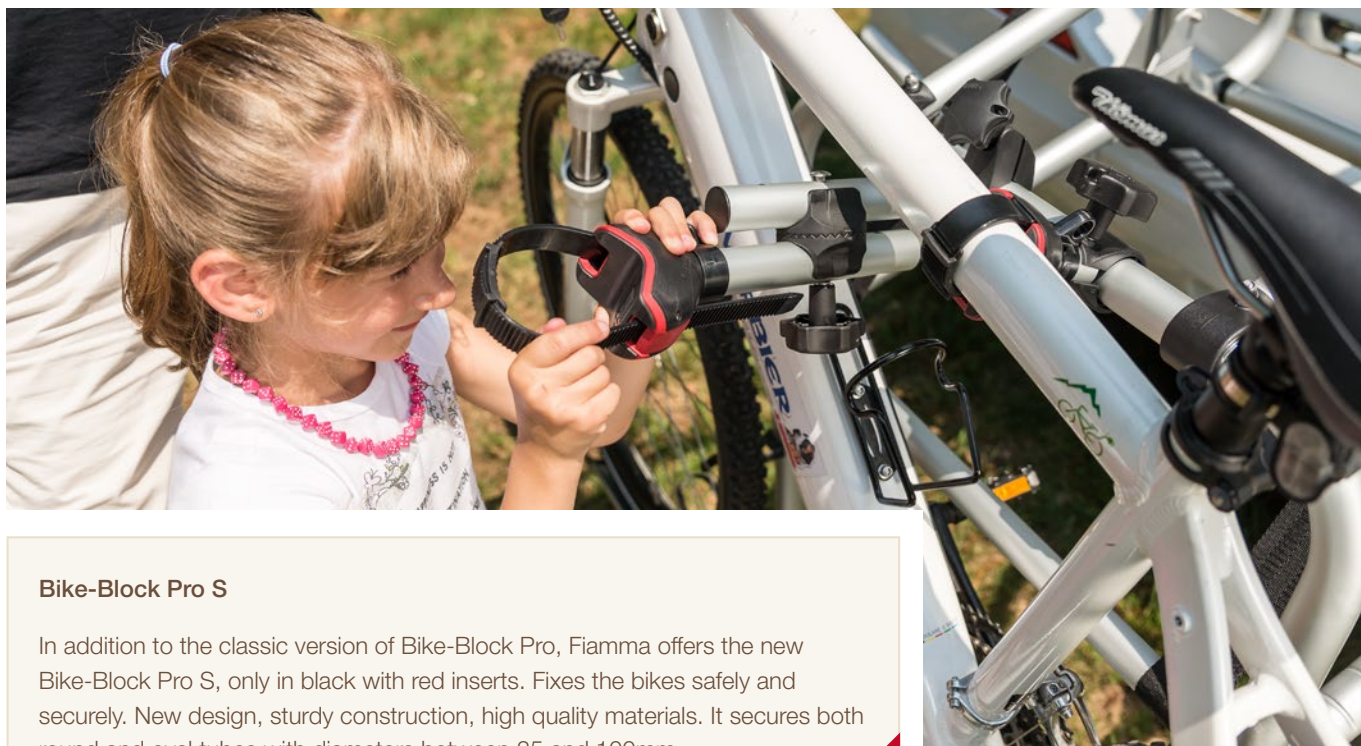

[7] Now you can turn your Carry-Bike Pro, Pro M, Pro C into a E-Bike bike carrier by purchasing the new Kit Upgrade E-Bike. Complete rail support base with two Rail Premium, structurally designed to carry two electric bicycles.

Bike-Block Pro S

Bike-Block Pro S

In addition to the classic version of Bike-Block Pro, Fiamma offers the new Bike-Block Pro S, only in black with red inserts. Fixes the bikes safely and securely. New design, sturdy construction, high quality materials. It secures both round and oval tubes with diameters between 25 and 100mm.

Ergonomics and design synthesis

By changing the position of the knob that fixes the Bike-Block to the Carry-Bike we have allowed the free rotation of the clamp and of the bikes support.

The knob is now located at the front of the block, and the fixing of the anti-scratch rubber support has been improved to make it an example of design and convenience.

Not suitable for Carry-Bike with offset rails

rear boxes and drying rack

EASY DRY

Drying rack adaptable to rail supports of most bike carriers

[3] Quick installation on the folding rail support base of all bikes carriers with Ø 35mm. tube. No drilling is required on carry-bikes with wheelbase 60-80cm.

The final parts of the Easy Dry are hooked to the tube of the rail support and then the drying rack is quickly ready to be used. You can even travel with your Easy Dry fixed on, thanks to its innovative folding structure.

Comes complete with plasticized ropes for hanging clothes and with adjusting handles.

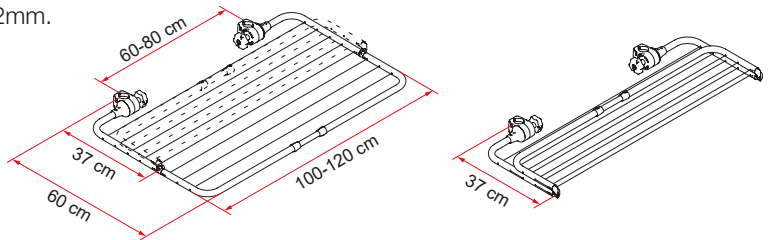

Made of resistant light tubular anodized aluminium Ø 22mm.

Adjustable length:

- from min. 100 to max 120cm.

Width:

- open 60cm.
- closed 37cm.

CARGO BACK

renewed

[1] New and modern restyling of the colours for the convenient soft luggage bag, made of solid, tear-resistant and waterproof polyester that can easily be installed on all rear bike carriers. Ideal for transporting chairs, camping equipment or sporting goods. Quick attach and remove system. Water resistant thanks to the YKK zippers. Fixing straps included.

Dimensions:

- Open 120x70x35 cm.
- Closed 38x28x10 cm.

KIT FRAME CARGO BACK

[2] The ideal system to keep your Cargo Back sturdy also when it's not completely full. Made of light anodized aluminium tubes and plastic connector pieces to be assembled together for a solid fastening.

This is a removable kit, easy to assemble and easy to fit inside your Cargo Back.

Dimensions:

- Open 119x69x32 cm.
- Closed 69x17x7 cm.

Easy Dry		100x60 cm	1,2 kg	06306-01-

* Not suitable for Carry-Bike with offset rails

FAQ - Frequently Asked Questions

Q - Do you have Fiamma dealers in my area?

A - To find your nearest Fiamma dealer, visit our web page "points of sales" on fiamma.com site.

Q - Can I purchase Fiamma accessories directly from Fiamma?

A - No, you can't buy directly from Fiamma. However you can easily place an order to your nearest Fiamma dealer (click on "points of sale" on our web site fiamma.com).

Q - Can I purchase Fiamma spare-parts directly from Fiamma?

A - To buy Fiamma spare parts please address your request to your reliable dealer.

Q - Can I bring my products to Fiamma to get them repaired?

A - No, we don't have a public service point but we suggest you to apply to a Fiamma dealer listed on "points of sales" on fiamma.com.

Q - How long does Fiamma warranty last and how does it work?

A - The warranty on Fiamma products lasts 2 years. It is necessary to have the relevant invoice/receipt of your product when visiting your dealer.

Q- What information must I provide to the service point to order spare parts?

A - The model of the product and its serial number (for awnings and Carry-Bikes), a copy of the relevant proof of purchase if the product is under warranty.

Q - Where is the S/N (Serial Number) of the awning?

A - The S/N of the awnings is on the internal side of the leadbar (F35/CaravanStore) or on the right arm (F45/F80/F65/Eagle); in order to read it you must open the awning.

Q - What awning can I install on my vehicle?

A - The choice of the awning depends on several factors: type of vehicle (motorhome, caravan, van), and type of structure. Our catalogue provides useful information to understand which is the suitable product for you. For specific information we always recommend that you consult your dealer.

Q - What is the difference between F45/F70 and F80/F65?

A - The fundamental difference between these two models is that F45/F70 is suitable for installation on the wall of the vehicle while the F80/F65 on the roof of the vehicle. The choice must be made according to the shape of the vehicle; when possible (when the wall of the motorhome is flat and with no windows, etc.) is always better to choose an F45/F70.

Q - What is the difference between the F45/F70 awning and F35pro awning?

A - The F45 (like the F80/F65) awning is the top of our line, high technology, with automatic opening using a crank handle. The F35pro awning has a smaller case, is less expensive and lighter and the opening/closing operation is manual, rolling the fabric in and out by hand.

Q - Are the installation adapters standard delivered with my awning?

A - A standard set of adapters (Kit AS 110/120/400 o 400L) is delivered with every F45s, F70 and F45L awning. We also have many other adapter kits specially designed for specific vehicles. The F45 Eagle awnings are delivered with full length AS bracket. The CaravanStore and the F35pro can be installed in the caravan awning rail where possible, otherwise you can order separately specific adapters. The Fiamma F80/F65 awnings are always supplied without adapters as the mounting system is different depending on what type of vehicle you have, so you have to order the installation brackets separately.

Q - Can I equip my Fiamma awning with a 12V motor afterwards?

A - Only the F45s, F45L and F80/F65 can be equipped with a 12V motor afterwards. CaravanStore and F35pro can not be motorized.

Q - Do Fiamma awnings always include a central rafter?

A - Not always. All F45 and F80/F65 awnings from 4.00m length are standard delivered with central tension rafter with the exception of the Eagle versions. One Rafter CaravanStore (Item No. 03888-01-) is standard included in the CaravanStore 4.10m and 1 Rafter + 1 CaravanStore Support Leg in CaravanStore 4.40m. In all other awning lengths the Rafter must be acquired as an optional accessory.

Q - Does my awning have support legs?

A - Yes. Support legs are included in all our awnings from 2.00m lengths onward. They are attached permanently to the awning and fold up inside the case when the awning is closed. Our Eagle awnings are self supporting and do not include support legs.

Q - What is the difference between fixing the support legs on the floor or on wall (using the appropriate brackets supplied as standard)?

A - It is always necessary to use support legs when opening an awning. The only exceptions are the Eagle models, which, not having the legs, are equipped with reinforced arms and structure. Fixing the legs to the ground, with the proper pegs, or on the wall of the vehicle with the suitable brackets, are both correct methods of operation.

Q - For the Fiamma ZIP and CaravanStore ZIP can I buy the awning and the enclosure separately?

A - No, ZIP versions are sold only complete. However, in special cases, you can require only the awning or only the complete closure (frontal + side panels) by replacing the complete closure of a damaged product.

Q - What can be used to clean my awning fabric?

A - The best way to clean it is to use water with a cloth or a soft brush. If it is very dirty, add some degreasing detergent to the water. Make sure to rinse carefully any remaining detergent on the fabric.

Q - How far can I extend the awning?

A - You can unroll the awning stopping at any distance you prefer. When the awning is fully extended, the fabric can sag lightly, just roll it back for about one turn to put it in tension again.

Q - Can I use my awning to protect me from the rain?

A - The awning is meant to shelter you from the sun and moderate rain. Therefore, we recommend you close the awning in case of strong wind, heavy rain or snow. For moderate rain use the central rafter and lower one leg to allow water running off. Water pooling can stretch the fabric causing faulty closing. Be careful because the fabrics with this kind of problem are not covered by warranty.

Q - Can I drive when my CaravanStore is mounted?

A - For small and longer distances, you can leave the CaravanStore mounted on the vehicle. Please consider that the vibrations can make the awning beat against the wall of the vehicle, causing noise and damaging the wall of the vehicle. Always check with the manufacturer of your caravan/motorhome.

Q - On which awnings can the Privacy Room be installed?

A - Privacy Room is designed for F45s, F45L F45 Ti, F45 Ti L, F45i and F45i L awnings. F80/F65 only if installed on Fiat Ducato after 06/2006 and on Caravan.

The Privacy Room cannot be fitted on models produced before the F45 Plus and Elegance.

The Kit Privacy O (which is standard delivered with the Privacy Room) allows the installation of the Privacy Room on Omnistor 5002, 5003, 4900 and Tristor2 awnings too.

FAQ - Frequently Asked Questions

Q - Can I install the Privacy Room for F45 on a motorhome with an F80/F65 mounted?

A - Normally no, but there are rare cases in which it is possible.

Q - Is the Privacy Room a tent awning?

A - No, the Privacy Room is not a tent and it needs to be mounted on an awning. The Privacy Room offers you extra space and also the possibility to sleep in it when the weather is nice. Please note that the Privacy Room is not a permanent tent and needs to be closed in case of storm and wind.

Q - Can the Privacy Room be used in Winter when snowing?

A - No, it is certainly not suitable. Even a thin layer of snow causes a heavy weight on the awning. This can lead to serious damage.

Q - Is the installation kit standard delivered with the Privacy Room?

A - Yes, the installation system is standard delivered with the Privacy Room (panels+aluminium structure), together with the Mega Bag (Large strong bag, suitable for transporting goods in the storage compartment or the Privacy during travelling).

Q - Is there a side or front panel that I can use on my awning?

A - Yes, as an alternative to the enclosures (Privacy Room), Fiamma offers front (Blocker) and side panels (Side) in different versions and lengths.

Q - Can I mount Side and Blocker panels on my awning?

A - There are many models for winch awnings (F45, F70, F80/F65) and for manual awnings (CaravanStore, F35pro).

Q - Which Carry-Bike can I install on my vehicle?

A - The choice of the Carry-Bike depends on the type of vehicle (motorhome, caravan, van) and on its structure. You can find a wide range of information on this catalogue. For further information and for professional support, we suggest to consult your dealer.

Q - Is the rear wall of my vehicle strong enough to install a Carry-Bike?

A - Most of the vehicles don't show any problem when mounting a Fiamma Carry-Bike, but we suggest for you to contact the dealer or the manufacturer of your vehicle in order to locate the most suitable installation points on the back of your vehicle (as they differ depending on the manufacturer).

Q - Can I carry electric Bikes on the Carry-Bike?

A - The Carry-Bike Lift 77, Pro and Pro C E-Bikes, Caravan XL A Pro 200 and Active E-Bike, Mercedes V Class Lift E-Bike and the models for the garage facility are ideal for transporting electric bikes, possibly with the addition of the optional Rail Premium E-Bike.

We suggest you place the Rails Premium E-Bike near the wall of the vehicle and for you to remove the batteries of electric bikes so as to limit the weight on the wall.

In accordance with the capacity of the Carry-Bike, a maximum of 2 E-bike rails can be used, each can carry up to 30 kg.

Q - Can I carry my motorcycle on the Carry-Bike?

A - Absolutely not. Fiamma Carry-Bikes have been designed for the exclusive transport of bicycles. Even if your motorcycle doesn't exceed the maximum load of the Carry-Bike, this value is calculated to uniformly distribute the weight on the structure; an excessive weight, like that of a scooter, localized on a single rail, is not allowed.

Q - What is the maximum speed I can travel with the carry-bike mounted?

A - With a Fiamma Carry-Bike mounted on the vehicle you can't exceed the maximum speed of 110 km/h (for minivans) and 90 km/h for motorhomes, even if you carry only one bike.

Q - Can the plastic signal for protruding loads (Plastic Signal Item No. 98782-005) be used in Italy?

A - Unfortunately a Plastic Signal is not approved in Italy and therefore it does not meet the requirements of the law. The Alu Signal (aluminium) is approved by the Italian Ministry of Transport and is therefore suitable.

Q - In the box of my Garage product I can't find the screws for the fixing to the floor / wall of the garage?

A - Most of the products for garage facilities, including the Carry-Bike, are supplied without screws for fixing on walls or on the floor of the garage because their structure (thickness, materials, etc.) varies greatly depending on the model. For more information, please refer to the installation manual attached to the product.

Q -The roof of my vehicle has a thickness higher than 5 cm. Is there a way to install the Turbo-Vent?

A - Yes, you can install the Turbo-Vent or the Vent thanks to a special extension (code 98683-116). However, the extension is not a cover, and then the portion of the cut roof will be visible through the rooflight.

Q - What Ultra-Box should I choose for my Carry-Bike?

A - All three Ultra-Box for Carry-Bike (320, 360, 500) can be mounted on all Fiamma Carry-Bike apart for the ones with the non-aligned rails, or not centred in the Carry-Bike (VW T5 D, VW T4 D, DJ 200, 200 D, Renault Traffic D). Be careful not to exceed the maximum capacity of the bike carrier, which has to be calculated adding the weight of the Ultra-Box to the weight of its contents.

Q - Can I travel with the rooflight open?

A - No, travelling with the rooflight open may damage it and it's dangerous for other motorists.

Q - What is the maximum distance I can have between the pump Aqua 8/F and services?

A - Fiamma pumps can bring the water at distances superior then the ones of any existing recreational vehicle.

Q - What is the maximum height Aqua 8/F pump can push the water?

A - Even in this case Fiamma pumps have a hydraulic performance that is superior to the needs of campers and motorhomes.

Q - What is the maximum water temperature for Aqua F and Aqua 8 pumps?

A - The water must be at room temperature. It can't be preheated with other devices.

Q - What versions of Safe Door and Security can I install on my vehicle?

A - There are no special constraints if there is enough space for the product on the external side, and for its bracket (or frames) on the inner side.

Q - Does Fiamma Super Kem and Super Rinse respect the environment?

A - Of course. Fiamma chemical products don't contain formaldehyde, comply with all national and international regulations respecting the environment.
