

# PHILIPS

## Headlight Restoration Kit with UV Protection

## Better light saves lives

- Over time, headlights wear down and become scratched due to impacts and general deterioration.

Plastic headlights are manufactured with an outer ultraviolet (UV) protection coating. This coating degrades from exposure to the elements, causing fading, yellowing, oxidation

- This can result into **loss of up to 40% vision at night**

Low visibility can lead to increased change of car accidents.

Better visibility will ensure a better and safer journey.

- The Philips headlight restoration kit is an easy tool free solution. With 4 easy steps, headlights can be restored to their original shine with up to 2 years protection against UV.

## What's in the Box?

- 1 bottle of water based Pretreatment (29,5 ml)
- 1 bottle of Cleaner/Polish (29,5 ml)
- 1 bottle of Shine Restorer/Preserver (29,5 ml)
  
- 1 piece sanding paper of 600 (coarse)
- 1 piece sanding paper of 1500 (medium)
- 1 piece sanding paper of 2000 (fine)
  
- 10 paper towels
  
- 1 pair of gloves (one size fits all)

## How does it work?

The headlight restoration kit comes with everything you need to **polish two headlights.**

**Get Professional Results in Under 30 Minutes**  
**No Power Tools Needed**

Step 1: Clean with the included water-based pretreatment.

Step 2: If your headlight covers have severe yellowing, sand with 600, 1500 and 2000 grit sandpaper.

Step 3: Polish with the included headlight/cleaner polish.

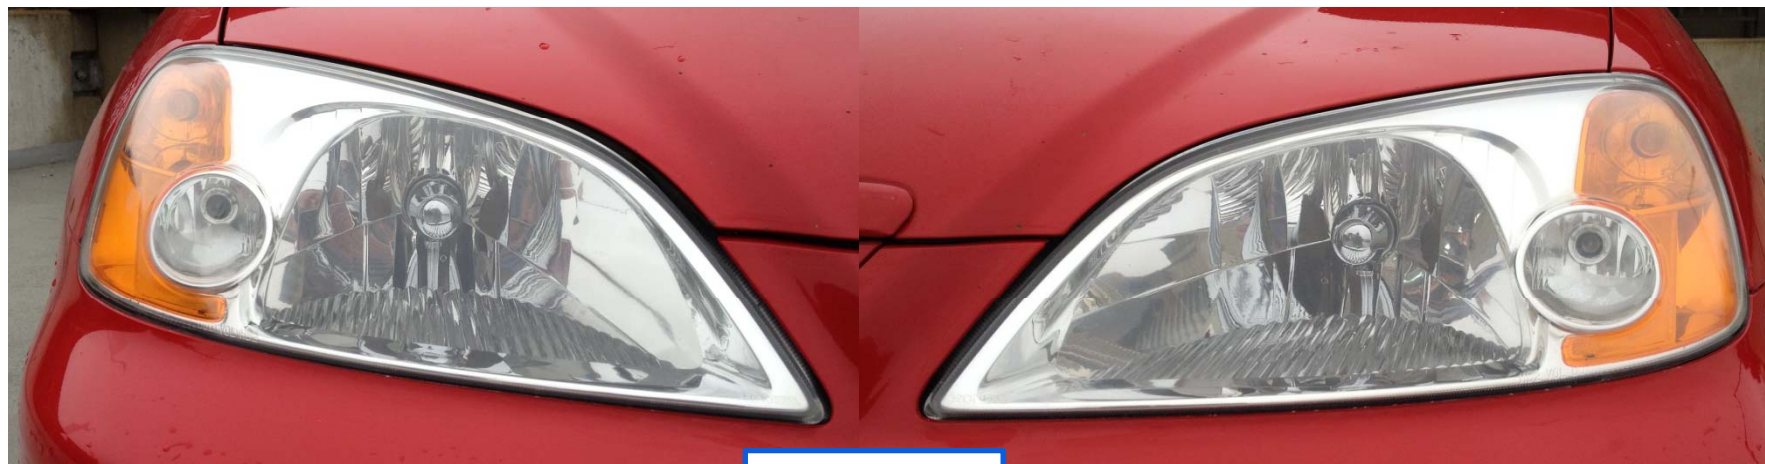

Step 4: Apply UV restorer/protector. Product dries in 10 minutes after application.
